

## Tools for checking: Evidence collation template

Use this table to compare evidence collected during the scanning phase with evidence gathered during the checking phase to see what gains the changes have made for your students. Use the same methods for collecting evidence with the same group of children (if possible).

| <b>Baseline evidence</b><br>From the scanning phase | <b>Checking phase evidence</b> | <b>Notes</b><br>Explanatory or comparative comments |
|---|--------------------------------|---|
|   |                                |   |
|   |                                |   |
|   |                                |   |
|   |                                |   |
|   |                                |   |
|   |                                |   |
